

**HEATER FOR AN AUTOMOTIVE VEHICLE AND METHOD OF FORMING  
SAME**

5 **ABSTRACT**

There is disclosed a heater for an automotive vehicle or other article of manufacture. The heater typically includes a first conductive medium and a second conductive medium disposed upon a carrier. In a preferred embodiment, the first conductive medium includes a first section and a  
10 second section that are electrically connected by a second conductive medium. The second conductive medium preferably exhibits a positive thermal coefficient.
